

Emily Holland

Frontend Web Developer

Manchester, UK

emilyholland25@yahoo.com

emilyholland25.github.io

Front-End / Web Developer with **4 years of commercial experience** building and maintaining responsive, accessible and user-focused websites. Strong hands-on experience with **HTML, CSS, Sass/SCSS, JavaScript, jQuery, PHP and WordPress**, with experience taking projects from design implementation through development, testing, deployment and ongoing maintenance.

Experienced in translating **Figma and Adobe Creative Suite designs** into responsive, pixel-accurate web interfaces, with a strong understanding of **UI/UX principles, user journeys, usability and accessibility**. Comfortable developing reusable components and CMS structures, integrating APIs and third-party functionality, debugging issues and optimising websites for performance and cross-browser compatibility.

Experienced working independently and collaboratively with designers, clients and multidisciplinary teams, including delivering **WCAG-conscious websites for local councils and other public-facing organisations**. Currently developing commercial-style React experience through personal projects.

Portfolio: EmilyHolland25.github.io.

***Disclaimer:** Recent commercial projects cannot be publicly displayed on my portfolio due to client confidentiality. I can share links upon request or during the interview process.*

Work Experience

Web Developer, Gooney (2023 – 2026)

Responsibilities and Skills:

- Independently developed and maintained multiple client websites from initial design implementation through development, testing, deployment and ongoing maintenance.
- Built responsive websites using **HTML, CSS/Sass, JavaScript, jQuery, PHP and WordPress**, translating design files into functional, reusable web interfaces.
- Implemented responsive layouts across desktop, tablet and mobile breakpoints, ensuring consistent presentation, usability and cross-browser compatibility.
- Worked from **Figma and Adobe design files**, collaborating with designers to accurately translate visual designs into production-ready websites.
- Developed reusable website components and CMS structures to provide clients with flexible and intuitive content management.
- Implemented custom front-end functionality and interactive website features using JavaScript and jQuery.
- Integrated APIs, WordPress plugins and third-party services to extend website functionality and meet project requirements.
- Tested and debugged websites using browser developer tools and structured troubleshooting, resolving functional, responsive, accessibility and performance issues.
- Contributed to the development of **WCAG-conscious websites for local councils, schools and other public-facing organisations**, considering accessibility and usability throughout the development process.
- Worked within an Agile-style development workflow using **Trello, development tickets and regular stand-ups** to manage priorities, communicate progress and coordinate work across concurrent projects.
- Worked directly with clients to understand requirements, provide technical support and help clients manage and update their websites.
- Managed multiple concurrent projects independently, prioritising workloads and delivering websites within demanding project deadlines.
- Worked within a fast-paced agency environment while maintaining development quality, usability and attention to detail.

Web Developer, Future Design Consultants (2021 – 2023)

Responsibilities and Skills:

- Developed and maintained responsive websites for a range of clients using **HTML, CSS, JavaScript, PHP and WordPress**.
- Translated design concepts into responsive, pixel-accurate web interfaces while maintaining usability and cross-browser compatibility.
- Collaborated closely with designers and clients to refine layouts, functionality and website requirements.
- Developed and customised **WordPress themes and plugins** to deliver functionality tailored to individual client requirements.
- Built front-end components and page layouts using HTML, CSS, Sass and JavaScript/ jQuery.
- Tested and debugged websites across browsers and devices, identifying and resolving front-end and WordPress issues.
- Optimised website code and functionality to improve performance, maintainability and user experience.
- Provided ongoing technical support to clients and assisted with website updates and troubleshooting.
